**Teaching and Learning Exchange**
A research exchange and collaboration with Pitt’s discipline-based teaching groups.

**Course Incubator**
Teams work with faculty to transform courses/curricula, fostering educational innovations based on current research.

**Center for Mentoring**
New programs that facilitate mentoring, guidance and support for faculty, by faculty.

**Center for Diversity in the Curriculum**
Resources and programs to help faculty build diversity into courses and create an inclusive learning environment.

**Center for Communication**
Portal through which faculty can deliver their research and scholarships to students and the broader community.

**Assessment of Teaching**
Expand the portfolio of approaches to assess teaching practices, going beyond the standard teaching survey.

**Pathways for Faculty**
Deep dive into your curriculum and enrich your teaching practice by focusing on one of four teaching areas.

**Open Lab**
Progressive and engaging learning experiences through innovative technologies.

**Teaching Partners**
A community that engages faculty who use the Teaching Center’s resources to support and enhance their teaching practice.
The **University Center for Teaching and Learning** is the hub for teaching innovation at Pitt. We can help you with:

- Accessibility
- Assessment of Teaching
- CourseWeb (Blackboard)
- Classroom Technologies
- Graphic Design and Digital Media
- Design of Learning Spaces
- Educational Technologies
- Online Courses and Programs
- Graduate Student Teaching Initiative
- Teaching Support
- Testing Center
- Workshops
What faculty are saying:

“I had never set up a course with video modules. I was welcomed into the environment, shown how everything works, and walked through the process. Students have told me that they appreciate the time and energy I put into the video lectures.”

—Michael Lovorn, PhD
Assistant Professor of Social Studies Education, Department of Instruction and Learning, School of Education

“What I value most about working with instructional designers and technologists is the emphasis on the learning process and the needs of the learners. Their insights have made my courses much better.”

—Christinger Tomer, PhD
Associate Professor, School of Computing and Information

“Working with the University of Pittsburgh Testing Center is fantastic. They are a model for the rest of the University.”

—Ellen Cohn, PhD, CCC-SLP, ASHA-F,
Department of Communication Science and Disorders, School of Health and Rehabilitation Sciences

“I was able to get the support I needed to develop a project for my class over a single semester. The Teaching Center provided me with support at every stage of the process, helping to research the technology, to secure equipment, and to provide teaching guides and demonstrations to my class.”

—Erin Anderson, Assistant Professor
The Writing Program, Department of English
